

# EXPANSE

What if your child discovered and developed their unique genius?

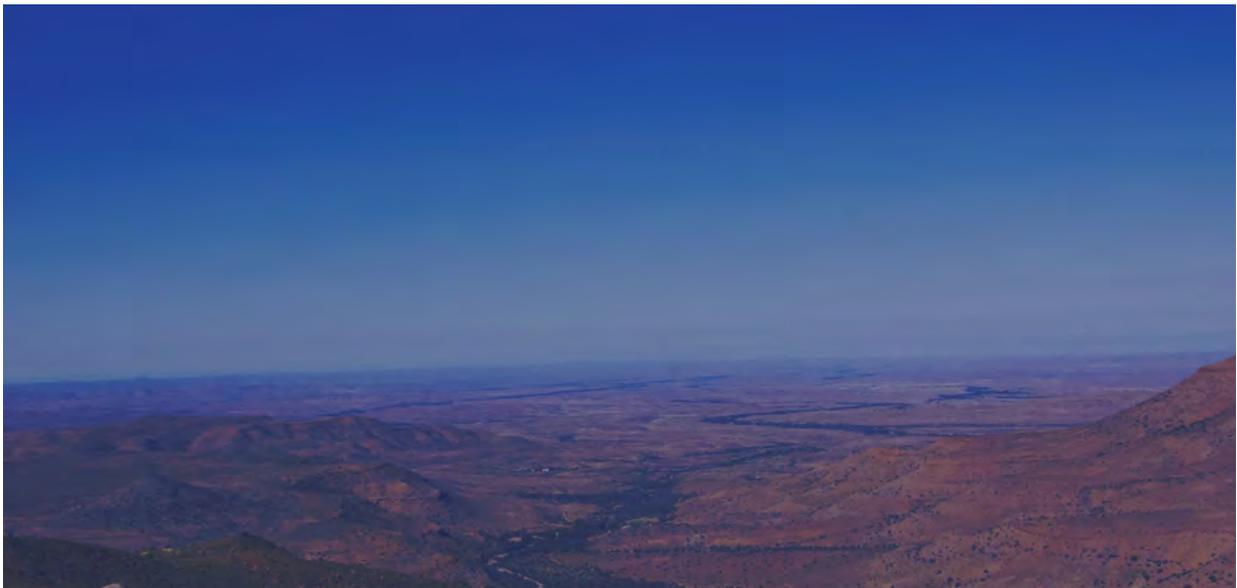

# What is Expanse?

**“Confident, articulate, creative,  
and critical thinkers will lead in  
the 21st century.”**

*Expanse Founder Michael Strong*

Expanse is a highly personalized learning community designed to cultivate your child’s unique genius, with a particular focus on intellectual, creative, and entrepreneurial genius. Where standard schooling pushes your child through their curriculum, we identify your child’s genius and crank it up to give them the best lifetime opportunities by graduation. Your child receives personal coaching on how to achieve extraordinary goals in their chosen domains of excellence while learning essential academic and personal skills.

# Why enroll your child?

The 21st century requires rich reading abilities, people versed in deep discussions, and collaborative problem-solving. It needs leaders who are purpose-driven and can inspire meaning. It needs students who are unafraid of the unknown and are excited to learn.

Expanse's Guides are committed to your students' success. Every Expanse student collaborates with their Lead Guide—an experienced mentor and learning coach—so that none are lost in the shuffle of pandemic virtual or hybrid learning.

At Expanse, students become confident, sophisticated thinkers with developed, textured beliefs. They understand what they're learning rather than emphasize giving "the right answers."

Given our emphasis on autonomy, freedom of thought, and adult-level performance, our students are brilliantly-prepared to enter the college of their choice; careers in art, design, film, entrepreneurship; or "New Collar" jobs such as coding, digital marketing and UI/UX. Academic-track students through Michael Strong's programs have obtained SAT gains almost twice the national average by means of our fun, engaging yet intellectually intense Socratic program.

Can you imagine your child loving school while they excel?  
That's reality at Expanse.

Monday	Tuesday	Wednesday	Thursday	Friday
Community	Community	Int'l STEM Bootcamp	Community	Community
Socratic	Socratic		Socratic	Socratic
Writing	Writing	Projects	Writing	Writing
Math	Math	Mentoring	Math	Math
Science	Science	Online Courses	Science	Science
Project	Project	Art	Project	Project

Currently, Expanse is 100% online. In the coming years, hybrid elements will be incorporated into our program.

Mom: "Have a great day, (Student)! I'm heading to work."

(Student): "Mom, you know what's weird? I've been really excited for school. Like, actually, excited."

"I learned more from 15 minutes here than I did in months at BASIS!"

Current Student

"M has always enjoyed school but I have never seen her as excited and joyful as she was today to be back in class at Expanse. I am so grateful that she has this opportunity."

Parent of Student

## What's the cost?

Tuition is \$7,990 if paid on an annual basis, which covers the entire academic year (September-June), or \$2,350 if paid on a quarterly basis (\$9,400 annually).

Students receive lab kits to investigate real-world phenomena, witnessing chemical reactions, separating water into individual elements, and more.

Need-based financial assistance is available. Tuition is prorated based on enrollment date.

**Admissions are rolling!**

## How to get started?

If your child's eyes sparkle with wonder and curiosity, and you seek to recapture that glow, schedule a 15-minute call with us today. Let's help them expand.
